## Press Release May 2008

### Bavaria Sets Sail with Mastervolt

Bavaria Yachts Australia has joined forces with Mastervolt as its supplier of Power Electronics on all of their yachts bought into Australia.

Bob Mulkearns, Managing Director of Bavaria Yachts Australia, has selected Mastervolt products as the ideal solution for power management equipment on Bavaria Yachts.

In consultation with his electrical contractor Paul Magee from Boatworks, and with assistance from Mastervolt's Business Development Manager Andrew Wilson, the decision was made to sign with Mastervolt, the premium brand of equipment in this field.

"Building over 3,000 yachts per year, Bavaria has developed a line of yachts that stand out for their solid and lasting value. Our customers are looking for high quality and value for money with their vessels, and I believe with Mastervolt now as our inverter/charger supplier we can continue to offer our quality yachts with premium inclusions that our customers demand".

"We see the Mastervolt product with its reliability and rugged performance as a major asset to our vessels and with the extensive service network across the country we are assured of fast and reliable service for our clients".

Mastervolt Australia is very excited with the acquisition of Bavaria as a major client and look forward to a long association with the brand for many years to come.
